

Would you like to color ecovio®?

Use Sicoversal® B by BASF Color Solutions Germany GmbH

Sicoversal® B is a masterbatch that is ideal for the coloration of ecovio®. Sicoversal® B is based on ecoflex® and all its ingredients are chosen according to European standards of compostability. This way, it is not only optimally tuned to ecovio®, but it is also compatible to a great number of further biopolymers. Apart from ecovio®, Sicoversal® B gives PLAs

and PLA compounds a brilliant color with an even color distribution. This masterbatch for biopolymers is thus suitable for a myriad of applications. Sicoversal® B fulfills the highest environmental standards and thereby contributes to a sustainable future. Special types for paper coating are also available.

Profit from the advantages of Sicoversal® B

- ♥ Certified according to EN 13432
- ♥ Suitable for food contact
- ♥ No toxic ingredients
- ♥ Biodegradable
- ♥ Compatible with numerous biopolymers
